Identity and Access Management (IAM)

Introducing the new Users list experience

We've redesigned the Users list experience to make it easier to use. Let us know what you think.

IAM > Users

Users (1) Info

An IAM user is an identity with long-term credentials that is used to interact with AWS in an account.

Find users by username or access key

	User name	Groups	Last activity	MFA	Password age	Active key age
<input type="checkbox"/>	Harshitha	Rns	Never	None	✓ Yesterday	-

Add user

12345

Set user details

You can add multiple users at once with the same access type and permissions. [Learn more](#)

User name\*

+ Add another user

Select AWS access type

Select how these users will primarily access AWS. If you choose only programmatic access, it does NOT prevent users from accessing the console using an assumed role. Access keys and autogenerated passwords are provided in the last step. [Learn more](#)

Select AWS credential type\*

☐ Access key - Programmatic access

Enables an **access key ID** and **secret access key** for the AWS API, CLI, SDK, and other development tools.

☐ Password - AWS Management Console access

Enables a **password** that allows users to sign-in to the AWS Management Console.

\* Required

CancelNext: Permissions
